RF Exposure

Applicable Standard

According to §1.1307(b)(5), systems operating under the provisions of this section shall be operated in a manner that ensure that the public is not exposed to radio frequency energy level in excess of the Commission's guideline. This is a Portable device. The **Section 4.3.1 and Appendix A of KDB447498 D01 V05 was used as the guidance.**

Calculation Result (Worse Case):

WIFI Mode

[(max. power of channel, including tune-up tolerance, mW)/(min. test separation distance, mm)] \cdot [$\sqrt{f(GHz)}$] =4.68/5 * 1.57= 1.47 this value is less than 3.0 for 1-g SAR and \leq 7.5 for 10-g extremity SAR.

Bluetooth Mode:

[(max. power of channel, including tune-up tolerance, mW)/(min. test separation distance, mm)] $\cdot [\sqrt{f(GHz)}] = 1.58/5 * 1.56 = 0.49$ this value is less than 3.0 for 1-g SAR and ≤ 7.5 for 10-g extremity SAR.

1.47+0.49=1.96<3

The SAR measurement is not necessary.
